Permits(s) Applied for: 1 - Article 19 Air Title V Facility

Project is located: in KINGS COUNTY

Project Description:

The Department has prepared a draft permit and has made a tentative determination to issue a Title V Permit renewal for a facility consisting of a Liquid Natural Gas (LNG) production system, six LNG vaporizers, three engine generators, two engine driven gas compressors and a manual paint booth; also included are exempt gas-fired boilers and air conditioners. Under this renewal, the facility requested to cap the facility-wide NOx emissions to less than 47.4 tons per year based on a 12-month rolling period to avoid Subpart 231-2, New Source Review requirements. The boilers and engines will comply with NOx RACT requirements under Subpart 227-2.

In accordance with 6NYCRR Parts 621.7(b)(9) and 201-6.4(c), the Administrator of the United States Environmental Protection Agency (USEPA) has the authority to bar issuance of any Title V Facility Permit if it is determined not to be in compliance with applicable requirements of the Clean Air Act or 6NYCRR Part 201.

Persons wishing to inspect the subject Title V files, including the application with all relevant supporting materials, the draft permit, and all other materials available to the DEC (the "permitting authority") that are relevant to this permitting decision should contact the DEC representative listed below.
